Account Types, Register and Access Review (HPMG, practice document)

Nov 5, 2026 · @Musah

This record defines the account types allowed on DC01, lists every account with its authorized user and access, and records the first access review. It follows HPMG-POL-AC-001 section 9. HPMG and every person named are fictional, and the document was created on 2026-11-05, after the DC01 assessment, as remediation for POAM-002 (AC-2).

1. Account types

Type	Allowed?	Rules
Standard user account	Allowed	One per person. Created from an approved request. No administrator groups.
Named administrator account	Allowed	One per administrator, separate from the standard account. Privileged tasks only. No email or web browsing. System Owner approves membership and the ISO reviews it monthly.
Service account	Allowed	Needs a named owner, an approved request, a long random password and a stated purpose. Disabled when not in use.
Built-in system accounts (Administrator, Guest, krbtgt)	Allowed, restricted	Administrator and Guest stay disabled. krbtgt is used only by the domain itself and cannot be used to sign in.
Temporary and emergency accounts	Allowed	Expire within 30 days (emergency access within 72 hours).
Shared or generic accounts	Prohibited	Only with a written ISO exception.
Group or role accounts, guest and anonymous accounts	Prohibited	No exceptions.

Conditions for group and role membership. Membership in Domain Admins, Enterprise Admins, Schema Admins or Administrators needs a documented request approved by the System Owner and reviewed by the ISO. Enterprise Admins and Schema Admins stay empty unless a specific task requires a member, and the person is removed when it ends.

2. Account register

State as of 2026-11-05, taken from the account inventory (EV-0040) and the privileged group listing (EV-0039).

Account	Type	Authorized user	Privileged groups	Status	Created	Request	Account manager
adm.mbell	Named administrator	Marcus Bell, System Administrator	Domain Admins; Administrators	Enabled	2026-11-04	REQ-0002	System Owner (Priya Raman)
mbell	Standard user	Marcus Bell, System Administrator	None	Enabled	2026-11-04	REQ-0001	System Owner (Priya Raman)
Administrator	Built-in	None (generic account, no person)	Domain Admins; Administrators	Disabled 2026-11-04	At domain creation, 2026-10-14	Not required for a built-in account	System Owner (Priya Raman)
Guest	Built-in	None	None	Disabled	At domain creation, 2026-10-14	Not required for a built-in account	System Owner (Priya Raman)
krbtgt	Built-in (domain key distribution)	None	None	Disabled by design	At domain creation, 2026-10-14	Not required for a built-in account	System Owner (Priya Raman)
svc_nessus	Service account	No owner assigned	None	Disabled	2026-10-21	None. Created without an approved request.	System Owner (Priya Raman)

The "Created" dates come from the account inventory and are in DC01 time (UTC-08:00).

3. First access review

Item	Value
Review date	2026-11-05

Item	Value
Reviewer	Daniel Okafor, Information Security Officer (fictional)
Scope	All six accounts in the register and the four privileged groups
Evidence reviewed	Account inventory EV-0040; privileged group listing EV-0039; access requests EV-0038
Next monthly review (privileged groups)	2026-12-05
Next quarterly review (all accounts)	2027-02-05

Results

Account or group	Result	Action
adm.mbell, mbell	Match approved requests REQ-0002 and REQ-0001.	None
Administrator	Disabled. Still a member of Domain Admins and Administrators because the group memberships are built in.	None. Keep disabled. Re-enabling needs a System Owner approved request.
Guest, krbtgt	Disabled. Expected.	None
svc_nessus	Disabled. Created 2026-10-21 with no approved request and no named owner.	Stays disabled. Removed on 2026-12-05 unless an owner submits an approved request first.
Enterprise Admins, Schema Admins	Empty. Expected.	None
Domain Admins, Administrators	Members match the register.	None

The reviewer is the ISO, who holds no administrator rights, so the review is independent of the person who manages the accounts. The reviewer and the approvers are fictional people in a fictional organization.
