Change Ticket CHG-0001 (HPMG, practice document)

Harbor Point Medical Group (HPMG) and all people named are fictional. This document exists only for assessment practice.

Item	Value
Ticket	CHG-0001
Title	Move audit, Security log size and archive settings into GPO HPMG-DC-Security-Settings
System	DC01 and the Domain Controllers OU
Requested by	System Administrator (fictional)
Date requested	2026-11-06
Related items	POAM-010, deviation DEV-003, HPMG-STD-CM-001 Section 4 rows 14 to 16, HPMG-POL-AU-001 section 7.1
Type	Standard change to a baseline setting

1. Reason

The audit subcategories, Security log size and archive-when-full setting were applied locally on DC01 with auditpol and wevtutil. The audit policy says to set them in a GPO. Local settings would be lost on a rebuilt or added domain controller. This change removes deviation DEV-003.

2. What changes

Setting	Current value (set locally)	New value (set in the GPO)
Advanced audit subcategories	As listed in HPMG-POL-AU-001 Section 6	Same values, set in Advanced Audit Policy Configuration

Setting	Current value (set locally)	New value (set in the GPO)
Force audit policy subcategory settings to override category settings	Not set in a GPO	Enabled
Security log maximum size	1 GB	1 GB (1048576 KB)
Security log: archive when full	Enabled	Enabled

No setting value changes. Only the place where each setting is managed changes.

3. Risk and impact

Risk: Low. If the GPO is set wrongly, audit settings could be weaker than today or the log could overwrite records. The values are the same as the current ones, and the result is checked after the change.

4. Implementation plan

1. Save the current audit policy as a rollback file (`auditpol /backup`).
2. Edit GPO HPMG-DC-Security-Settings in Group Policy Management and set the values in Section 2.
3. Run `gpupdate /force` on DC01.
4. Verify the effective settings and save the output with its SHA-256 hash.

5. Rollback

Restore the audit policy from the rollback file (`auditpol /restore`), set the Security log size and archive setting locally with wevtutil as before, and remove the new settings from the GPO.

6. Verification (expected result)

- `auditpol /get /category:*` shows the same values as before the change.
- `wevtutil gl Security` shows maxSize 1073741824, retention true and autoBackup true.

- `gpresult` and the GPO report show the settings coming from HPMG-DC-Security-Settings.
- `Get-GPO` shows a new modified time for HPMG-DC-Security-Settings that matches this ticket.

7. Approval (change control board, fictional)

Role	Name	Decision	Date and time (Eastern)
Director of IT (chair)	Director of IT (fictional)	Approved	2026-11-06, 19:28
Information Security Officer	Daniel Okafor (fictional)	Approved	2026-11-06, 19:28

The change must not be made before the approval time above.

8. Closure (completed after the change)

Item	Value
Implemented by	System Administrator (fictional)
Date and time implemented	Started 2026-11-06 20:21 Eastern, after the 19:28 approval. Completed 21:04 Eastern. Verified 21:08 Eastern.

Item	Value
Result	Completed after two corrections. (1) Attempt 1, 20:21: the GPO did not apply the audit settings and all audit subcategories fell to No Auditing. Audit policy was restored from the rollback values at about 20:48 (EV-0059, EV-0060). (2) Attempt 2, 20:57: the audit extension was registered on the GPO, but Credential Validation, Logoff, Directory Service Access and Network Policy Server were missing from it (EV-0061). They were added at 21:04. (3) Attempt 3, 21:08: verification passed. The effective audit policy is identical to the pre-change backup (60 of 60 subcategories), the GPO holds all 20 audit settings, and the Security log is 1 GB with archive-when-full set from the GPO (EV-0062). Deviation DEV-003 is closed.
Evidence	EV-0059 (rollback file), EV-0060, EV-0061, EV-0062

Lesson: after editing audit settings in a GPO, check within five minutes that the number of enabled subcategories matches the pre-change backup. Audit logging was off for about 27 minutes during attempt 1, which the change plan did not catch.
